Internet Viruses and Crime On A Rise In China
By Xiao Qiang :: 2005-05-08, 09:16 AM :: Information Revolution
From allheadlinenews.com:
Roughly 20% of the world's hijacked computers sending out spam are in China.
It is believed that the amount of spam, internet crime, and innominate material will continue to increase as the

Antivirus company Symantec last week reported the presence of "spyware" bundled with Grokster and Limewire, two popular swapping downloads. The code evidently not damage computers, but it surreptitiou
